WORK EXPERIENCE

Software Engineer

Verb Inc

📅 2019 - current 📍 Austin, Texas

- Attended 100+ weekly stand-up meetings to receive tasks and instruction for weekly goals
- Ensured the performance, quality, and responsiveness of customer application.
- Researched and implemented design tokens into the app, changed 2,000+ files.
- Created a Front-end Interview coding test with 10+ challenges at different levels.

Junior Front-End Engineer

PNI Digital Media Ltd

📅 2019 - 2019 📍 Austin, TX

- Built out updates and new features to application built on AngularJS.

PROJECTS

SimplePlanets NFT DApp
SimplePlanets.com

Creator

📅 2021 - current

- Created over 100 layers to randomly generate 10,000 ERC-721 NFTs.
- Utilized open source code to generate NFTs with heavy changes from me for rarity selections.
- Wrote a Solidity smart contract to mint my NFTs and distribute 10% of the costs to current holder.
- Added Chainlink VRF as a tamper-proof random number generator to select random holders for large rewards at minting tiers.
- Build and designed a space themed NextJS DApp for users to mint my NFTs and learn more about the project.
- Implemented ethers.js to run functions connected to my deployed Smart Contract.

EDUCATION

Advanced Programming Immersive

Hack Reactor

📅 2018

Learned about modern web technologies, scrum methodologies, and computer science fundamentals.
